MEMORANDUM FOR THE RECORD

SUBJECT: OSD Request for CIA Information Concerning
SALT II Negotiations for SFRC Responses

1. Attached is a portion of the transcript from the Secretary of Defense's testimony before the Senate Foreign Relations Committee concerning the INF Treaty. In the hearing, Senator Helms asked several questions for the record about CIA assessments of Soviet missile development during the 1979 hearings on SALT II. Secretary Carlucci's office asked CIA to provide the appropriate information to answer Senator Helms. Also attached are the proposed DI/SOVA responses which were forwarded to Opal Andrews of DOD (Assistant for Intelligence Programs and Legislative Coordination) on 9 February.

2. Before forwarding the responses to the Committee, OCA requested that DOD determine from [] of OCA which SFRC staffers had TS/Codeword clearances and could have access to this material. DOD was also informed that the material would have to be stored at the SSCI or at CIA Headquarters because of its TS/Codeword classification.

3. CIA analysts noted to DOD that the fourth paragraph, page 30, of the transcript may have to be classified ("During the negotiations..."). It would depend on where the Senator obtained the figures cited.
